## Model KBF LQC 720 | Humidity test chambers with ICH-compliant light source and light dose control

The main advantage of the BINDER KBF LQC series is the patented light photometry for photostability tests. Two 3D spherical sensors control the light dosage of UV-A and visible light. Once the desired light dosage is achieved, the chamber switches off automatically.

## BENEFITS

- Safe thanks to climatic homogeneity that far exceeds the accuracy required by ICH guidelines, even with a fully loaded unit. The light spectrum is $100 \%$ compliant with ICH requirements.
- Reliable thanks to failsafe operation without compromise. The interior and Longlife evaporator plate are made entirely from stainless steel.
- Smart, as a wide range of accessories makes it highly compatible for adaptation to specific customer requirements.
- Economical thanks to maximum effective volume which allows for $30 \%$ larger load compared to the competition.

1 All technical data is specified for unloaded units with standard equipment at an ambient temperature of $+22^{\circ} \mathrm{C} \pm 3^{\circ} \mathrm{C}$ and a power supply voltage fluctuation of $\pm 10 \%$. The temperature data is determined in accordance to BINDER factory standard following DIN 12880 , observing the recommended wall clearances of $10 \%$ of the height, width, and depth of the inner chamber. Technical data refers to $100 \%$ fan speed. All indications are average values, typical for units produced in series. We reserve the right to change technical specifications at any time.
2 Average value, measured at $25^{\circ} \mathrm{C}$ with a spherical sensor ( $\pm 10 \%$ ) by 12 cm below the light cassette. The values given in W/m2 refer to global radiation.
