MEET JACK ARGUE!!

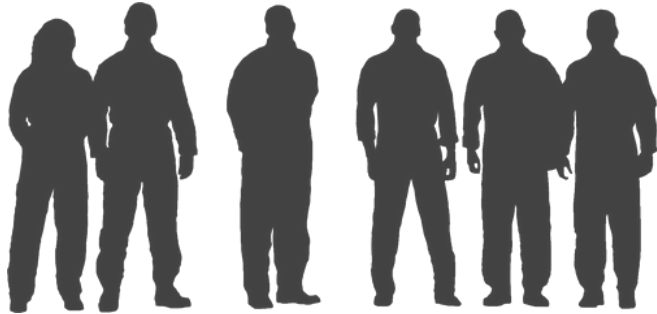

Please welcome Jack Argue, our newest Pacific Science, LLC team member!

Jack joins us as a Technical Sales Associate. In his role, he will work closely with our valued customers, providing top-notch service for lab equipment, conducting training sessions, and assisting with sales in the field. With his commitment to professional growth and adaptability to new challenges, we're confident

Jack will significantly impact our customers and our company's success.

Outside of work, Jack has a diverse range of interests. He enjoys staying active and engaging in physical fitness. He's also an avid traveler, seeking new adventures and experiences worldwide. Jack's adventurous spirit also extends to his palate, as he loves trying new foods. And here's a fun fact about Jack: he's been DJ'ing club music for over a decade!

STRONG, IN-PERSON CONNECTIONS WITH OUR PARTNERS

Pacific Science, LLC representatives have been traveling to meet with our manufacturers and reconnect with familiar faces. Our commitment to staying current on new product developments and factory training truly sets Pacific Science, LLC apart as a valuable partner in the industry. Providing support and expertise throughout the entire equipment lifecycle is a testament to our dedication to providing top-notch customer service.

OUR WINS AND MILESTONES

2023 has been an exciting year for Pacific Science, LLC. Our team has been hard at work enhancing our service offerings. We are excited to announce the expansion of our services by providing **Clinical Trial Cold Supply Chain Solutions**, **Temperature Mapping**, and **Freezer Rentals**. We partnered with GenVault Transport Services to provide safe and secure **Lab**

Moving services. These strategic additions allow us to provide our valued partners in academia, biotechnology, pharmaceutical, government agencies, and CROs with even more end-to-end cold chain solutions.

FEATURED SERVICE: TEMPERATURE MAPPING

Laboratory equipment temperature mapping, or thermal mapping, aims to identify temperature variations and ensure uniformity within a designated space. Measuring multiple points is critical to prevent hot or cold spots from affecting temperature-sensitive materials' integrity and safety.

Pacific Science, LLC offers onsite temperature mapping services for controlled temperature environments such as cryogenic and ultra-low freezers, cold rooms, and refrigerators. Please get in touch with us for more details.
