

THE NEWS

Pacific Science, LLC Quarterly Newsletter

Happy New Year from Pacific Science, LLC!

As we enter this exciting new year, we thank you for trusting Pacific Science, LLC, as a laboratory and cold storage solution partner. We look forward to continuing to support your needs throughout the year ahead.

MVE BIOLOGICS Receives FDA Registration

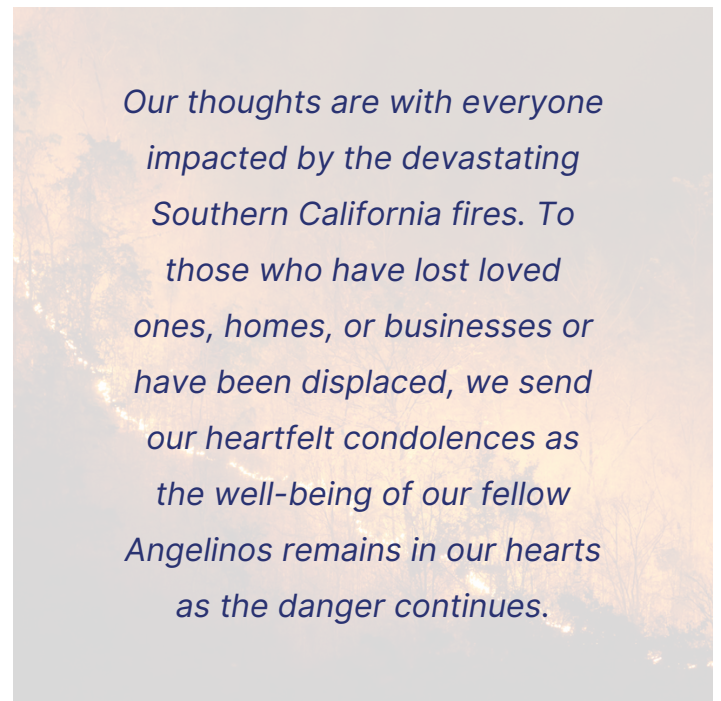

MVE Biological Solutions is now the only cryogenic storage manufacturing company with FDA registration for all three global manufacturing facilities and cryogenic freezers and dewars.

This milestone demonstrates MVE's dedication to delivering the highest-quality, most reliable solutions to the life sciences industry. Pacific Science, LLC is proud to partner with MVE and provide industry-leading products to our customers.

PGC Launches New Standard Walk-In

Parameter Generation & Control launched a new Standard Walk-In Temperature Only Stability Chambers, designed to deliver a uniform temperature range of -20°C to 50°C. Available in three standard sizes with short lead times of 2-3 weeks in most cases.

LEARN MORE 

Our thoughts are with everyone impacted by the devastating Southern California fires. To those who have lost loved ones, homes, or businesses or have been displaced, we send our heartfelt condolences as the well-being of our fellow Angelinos remains in our hearts as the danger continues.

Trusted by leading labs worldwide, protect research material and therapeutic products with MVE cryogenic freezers or PGC walk-in chambers.

CUSTOMER SUCCESS STORY:

WHEN DISASTER STRIKES 🏠 PACIFIC SCIENCE, LLC STANDS READY TO RESPOND

Over the weekend, we received urgent calls from several fertility clinic clients who were in imminent danger as the fires shifted and threatened their locations. Tasked with safely and securely evacuating multiple LN2 storage units containing irreplaceable human embryos, our cryogenic experts quickly devised an emergency relocation plan. Within an hour, our 6-man crew, including multiple trucks, was assembled. We quickly deployed and worked through the night and into the early morning hours to execute the plan and relocate the material out of harm's way to our biorepository in El Segundo, CA.

Pacific Science, LLC is committed to protecting customer material and is here to respond to emergencies.

Start the New Year Right with Preventative Maintenance

Ensure cryogenic freezers are running at peak performance in 2025. Preventative maintenance (PM) is key to avoiding unexpected failures, protecting critical material, and extending equipment's usable life.

Why Schedule Preventative Maintenance?

- Save money – scheduled maintenance is less expensive than emergency response.
- Detect and address issues before they become critical failures.
- Maintain consistent temperatures for sample integrity.
- Optimize energy efficiency to reduce operating costs.

Preventative Maintenance includes items like....

- Compressor and fan performance.
- Lid hinges, gasket, and insulation integrity.
- Solenoid valve, purge valve, and in-line filter replacement.
- Temperature sensors and alarm systems.
- Backup systems and battery functionality.

CONTACT US today to schedule a PM service and ensure your lab is ready for the year ahead!
