## QUALITY CORNER

### WHAT IS FACT? (Foundation for the Accreditation of Cellular Therapy)

If an offsite biostorage facility is FACT accredited by the Foundation for the Accreditation of Cellular Therapy, it means that the facility meets rigorous international standards for the collection, processing, storage, and distribution of cellular therapy products, such as stem cells, bone marrow, and other biologics used in regenerative medicine or transplantation.

- The facility has undergone a thorough inspection process.
- Strict quality management systems and operational standards, ensure biologic materials are handled safely and consistently.
- Shows a commitment to best practices and continuous improvement.

Our biorepository partner, Precision Stability Storage, was recently audited and approved as a FACT-accredited biostorage facility for one of our cell therapy clients.

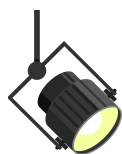

## Great partnerships go beyond transactions—they're built on trust, alignment, and shared success.

At Pacific Science, we believe that great partnerships go far beyond transactions. They are built on trust, shared goals, and a commitment to long-term success. That is why we proudly leverage our strong relationships with trusted vendors to provide solutions tailored to our customers' needs.

Recently, a customer needed a reliable LN<sub>2</sub> supplier to support their cryogenic storage setup. Because of our long-standing relationships with top gas providers, we were able to step in, make the referral, and help establish a reliable supply solution. With this vendor's unique 24/7 delivery option and no other supplier's capability to electronically monitor the tank status, there was no hassle, just solutions for this customer.

Customers who need equipment, service, or support do not just get a vendor. They get a team that's connected, aligned, and ready to solve.

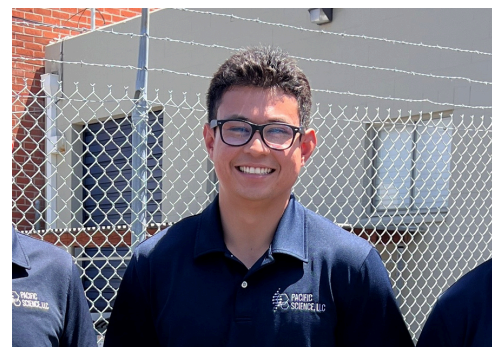

### EMPLOYEE SPOTLIGHT

**Name:** Michael Lebbin

**Job Title:** Sales Engineer

- Michael's decision to enter the life sciences industry was inspired by hands-on experience helping in the family business.
- Over the past 1.5 years, Michael has provided facility and storage services supporting the biorepository operations in El Segundo, CA.
- Now based in the Bay Area, Michael will focus on servicing LN<sub>2</sub> freezers and cold storage units for academia, biotech, and pharmaceutical clients, with plans to expand into a combined sales and service role.
- Certified in MVE and PPE training.
- Values daily client interaction and strong collaboration with his colleagues.
- Earned a degree in Finance from UC Santa Barbara.
- Outside work, he enjoys traveling, cooking, golfing, and spending time with his two dogs and cat.

#### Interesting Facts About Me

- Been to the Galapagos Islands.
- Played basketball and golf in high school.
- Trying to teach myself piano.
- Made a hole-in-one at the LACC golf course.
- I am a Chicago sports fan.
