NEW PRODUCT OFFERING: MVE SC 4/2V and SC 4/3V Vapor Shippers

We are excited to offer the newly redesigned MVE SC 4/2V and SC 4/3V Four-Liter Vapor Shippers—built for durability, extended performance, and enhanced protection during transport.

-  Significantly improved hold times (up to 26 days)
-  Stronger neck ring design
-  MVE's patent-pending Vapor Shield Technology safeguards against vacuum degradation.

Whether shipping critical biological materials across town or the globe, these next-generation vapor shippers deliver unmatched reliability in transit.

CA FACILITY EXPANSION

We're excited to share that our service partner, **Precision Stability Storage**, has recently expanded their California operations. The latest change represents a 20% increase in service capabilities and greater flexibility for materials that require storage in validated, tightly controlled environments.

-  24/7/365 Security
-  Multi-level controlled access
-  Quality System with procedures for all critical operations
-  Backup diesel generator is capable of 150% of the maximum power requirement.

Contact Pacific Science LLC to reserve space
or explore CA's expanded capabilities.

Navigating Capital Funding: Cold Storage Strategies to Mitigate Risks

In 2025, the life science industry continues to feel the ripple effects of reduced capital investment. With capital funding tighter than ever, many labs are being challenged to do more with less. Whether it's reducing on-site overhead, extending the life of existing equipment, and avoiding new purchases, now is the time to prioritize strategies to mitigate the impact of these funding challenges.

Defer Equipment Purchases

- Maximize equipment lifespan by establishing a **preventive maintenance** program to keep existing units running reliably.
- **Rental equipment** is an effective alternative.

Reduce On-Site Operations

To cut costs, some companies are downsizing their physical lab space or consolidating locations. This has increased demand for off-site storage solutions for temperature-sensitive materials and lab relocation services to safely transport critical assets to remote locations.

Discover how thoughtful planning and regularly scheduled preventative maintenance (PM) services, equipment rental options, off-site storage, and lab moving services are designed to support continuity without the need for heavy capital spend.

FEATURED SERVICE: LAB MOVING SERVICES

Lab Relocation You Can Rely On

Pacific Science, LLC offers expert relocation services tailored for laboratories moving irreplaceable, temperature-sensitive assets, lab chemicals, and high-value equipment.

From ultra-low freezers to cryogenic storage units, we ensure safe and compliant transport every step of the way—minimizing disruptions so research teams can stay focused on the science.
