>> NEW PRODUCT OFFERING

MVE HE Series Freezer with CryoVerse Connect Controller

The MVE HE Series Freezer with CryoVerse™ Connect Controller brings a new level of intelligence, visibility, and control to cryogenic storage.

- Real-time visibility into temperature, LN₂ levels, and system activity
- Intuitive 10.1" touchscreen designed for lab environments
- Secure, role-based access with full event logging and traceability
- Flexible connectivity
- Visual status light bar for instant system awareness across the room
- Seamless integration with existing installations

MVE Fusion 800 Series

The MVE Fusion® 800 Series is the next evolution of our self-sustaining cryogenic storage technology.

Built on MVE's patented Fusion® technology, the Fusion 800 delivers true cryogenic performance without the need for a continuous liquid nitrogen supply, now in a compact, lab-friendly footprint designed for space-constrained environments.

>> COMPANY UPDATE

Same Team. Same Service. New Name.

Our **Biorepository and Stability Storage service** offering has transitioned from Precision Stability Storage, LLC to **Pacific Science BioPharma Services** — still proudly serving customers from our facility in El Segundo, CA.

What This Means for Our Clients

- Name change and ownership only
- Same expert team
- Same quality systems and compliance standards
- No disruption to biorepository or stability storage services

EMPLOYEE SPOTLIGHT

Name: Trever Vanthof
Job Title: Biorepository Technician

Trever is a Facilities Technician at Pacific Science, where he supports temperature-controlled storage operations and helps ensure the safe handling of client biological materials.

Since joining the Life Sciences industry in February 2026, he has quickly become an important part of the team. Trever finds the most interesting aspect of his work is the precision required to maintain operational standards in cold storage environments and to ensure the accurate handling of clients' biological materials. He is also highly observant in operational environments, with strong attention to detail that enables him to identify subtle inconsistencies that might otherwise go unnoticed.

Outside of work, Trever enjoys golf, tennis, and running.

FEATURED SERVICE: FREEZER RENTALS

Pacific Science offers freezer rental solutions for laboratories, research institutions, biotech companies, and biopharma organizations requiring **temporary or long-term cold storage** support. Rental inventory includes **ultra-low-temperature -80°C freezers** as well as **small-to medium-sized liquid nitrogen freezers for cryogenic storage** applications.

NEWS

CIRM APPROVES OVER \$111M TO SUPPORT DISCOVERY & CLINICAL RESEARCH

The California Institute for Regenerative Medicine (CIRM) governing board approved funding of over \$80M for six new discovery grant applications and \$31M for three clinical trial applications to develop and test potential therapies for a range of rare and common diseases.

In addition, the board celebrated the first FDA-approved therapy funded by the agency. The therapy for leucocyte adhesion deficiency-I (LAD-I) developed by Rocket Pharmaceuticals was approved by the FDA during the meeting.
